Journal of Dairy Science—2002**S. C. Nickerson, Editor-in-Chief**

University Dairy Science Dept.

VA Tech

Blacksburg, VA 24061-0315

I have just completed my first 2 months serving as editor-in-chief and extend my sincere appreciation to Jean Rice, Crystal Rothganger, and especially to John Fuquay for their help in making the transition to this new post a smooth one. I am pleased to report that we are catching up with our backlog in the processing and printing of accepted manuscripts. The January through April issues of the *Journal of Dairy Science* (JDS) for 2003 have published an average of 380 pages.

In the fall of 2002, 18 Editorial Board members completed their 3-year rotation and were replaced by a new set of reviewers, who were recommended to the Board by the Senior or Section Editors of our various Journal sections. We are also in the process of identifying ad hoc reviewers who frequently review manuscripts to extend an invitation to join the Editorial Board as an appreciation for their efforts. To encourage use of Editorial Board Members, the abbreviation of the Journal section in which they have agreed to review papers has been added to the masthead page starting with the January 2003 issue; reviewer names are followed by the year during which they rotate off the Board, state of affiliation, and Journal section.

At the Winter ADSA Board Meeting, a proposal for the routing of symposium papers was accepted, which promises to streamline the submission, review, and online publishing of symposium papers as well as to assure their availability to searchable databases so that all articles can be cited by indexing sources. Moreover, page charges will be eliminated for authors of symposium papers. Pete Hansen has been appointed by the ADSA Board of Directors to serve as the Symposium Editor for JDS and Jeff Firkins will serve in this role for the *Journal of Animal Science* (JAS). Thanks to Pete

Hansen for chairing the subcommittee that developed this well-received proposal.

We also look forward to the inclusion of Interpretive Summaries (IS), which will soon be required to accompany each scientific submission to the Journal. These are brief summaries of no more than 100 words and will appear at the front of each issue following the table of contents. The IS will focus on the potential applications or the advancement of science resulting from the research presented in the summary, and should be instrumental in communicating the significance of results to interested parties such as legislators, producers, processors, as well as the general public. Harold Swaisgood and his subcommittee are in the process of developing a plan to publicize this new addition to authors and to introduce IS in upcoming issues of the Journal, and we appreciate their efforts.

In addition, HireWire Press will soon be hosting the online version of our Journal at their site, and the initial launch will take place this spring. Full-text html versions of JDS articles will be provided through HireWire, as well as hyperlinks to other references, an enhanced search engine, and numerous other options. So, with a renewed Editorial Board, an improved plan for processing symposium papers, the addition of Interpretive Summaries, and the introduction of HireWire, there are several exciting things taking place with JDS this year, and we hope these changes are welcomed by our membership!

For 2002, the *Journal of Dairy Science* published 398 manuscripts and 3633 numbered pages, of which 3506 pages were research papers (Tables 1, 2, 3, and 4). These totals included one ADSA Foundation Scholar Award paper, one Invited Review, and 21 Our Industry Today

Table 1. JDS 2002 statistics compared with past years.

	2002	2001	2000	1999	1998	1997

Average review times (d)	121	158	158	180	204	NA
Average production times (d)	159	125	137	115	143	NA
Average total times (d)	271	282	293	295	348	459

Table 2. JDS statistics for 2002

Month	Rev'd	Acce'pt'd	Publ'shd	Rev'd	Prod'd	Total'd
Jan	58	53	32	148	115	263
Feb	48	38	18	147	144	291
March	51	38	30	119	138	257
April	50	36	36	109	145	254
May	66	38	37	123	154	274
June	48	38	36	112	148	260
July	62	33	29	124	158	282
August	65	37	19	115	157	272
September	46	35	40	106	163	269
October	53	37	33	133	168	301
November	42	32	45	118	158	276
December	51	30	43	93	159	252
Average	53	37	33	121	151	271
Total	640	445	398			

papers. Of the published papers, 75 were in the Dairy Foods section, 133 in Physiology and Management, 128 in Nutrition, Feeding and Calves, and 61 in Genetics and Breeding section. A total of 640 manuscripts were received in 2002, up 36 from 2001 and 445 were accepted, up 73 from 2001. Collectively, these numbers reflect the healthy status of the Journal with a continued high submission rate. The Institute for Scientific Information (ISI) recognized the *Journal of Dairy Science* (JDS) as the Number 2 journal of 55 journals in the Agriculture, Dairy, and Animal Sciences category for 2001, and in the top 1% of all science and technology journals (50,000+) based on the ISI total citations. The average time from receipt of manuscripts to publication was 271 days as compared to 282 days in 2000 (Table 1). An average of 121 days was used in the review and revision process with an average production time of 159 days.

To deal with the increased volume and to decrease production times, ADSA, ASAS, and FASS reworked the staffing at headquarters in 2002. Jean Rice now serves as managing editor for both JDS and JAS; Cry-

tal Rothganger is in support with Manuscript Central and other administrative duties. Leon Jeter now works as production editor for both JDS and JAS, handling the correction and assembly cycles of the journals. In addition, we are happy to have Sharon Frick back in her role as a production/composition specialist. Many of you know her from contacts as the administrator for ADSA during the past year. We found we needed her more in publications. Gary Thomposon and Amanda Kolling have been hired as technical editors. Both are trained to work on a number of journals. Thomposon works primarily on JDS and Kolling on JAS.

Special gratitude is expressed to retiring editors R. D. Shanks and R. J. Grant. We thank Mike Akers and Steve Washburn who have agreed to serve another rotation as editors and welcome newly appointed editors M. Shutz and R. Kohn.

Appreciation is expressed to the Journal Management Committee: Clair Hicks (Chair), G. R. Wiggans, T. C. Jenkins, M. C. Lucy, H. E. Swaisgood, M. B. Hall, and Board Representative D. Barbano. For 2002–2003, the committee includes P. J. Hansen (Chair), T. C. Jen-

kins, H. E. Swaisgood, M. B. Hall, G. E. Shook, R. Jimenez-Flores, and Board Representative K. J. Boor. Thanks are extended to members of the Editorial Board for dedicated service in evaluation of manuscripts. This function is essential for timely publication of a quality journal. Completing terms on the Editorial Board in 2002 are: P. J. Berger, M. A. Cousin, J. K. Drackley, P. J. Gaynor, J. H. Harrison, R. W. Hartel, P. C. Hoffman, M. C. Lucy, K. L. Macmillan, D. J. Miller, R. L. Nebel, D. M. Smith, J. W. Spears, J. Thompson, M. J. VandeHaar, G. A. Varga, J. I. Weller, and M. C. Wiltbank.

Also, the services of ad hoc reviewers are required for timely and quality reviews of manuscripts. The willingness of these individuals to serve in this capacity in 2002 is appreciated.
