Erratum to “Effects of a molasses-coated cottonseed product on diet digestibility, performance, and milk fatty acid profile of lactating dairy cattle” (J. Dairy Sci. 93:3128–3135)

C. R. Mullins and B. J. Bradford

An error was made in the reported feeding rate of the direct-fed microbial (DFM) in this paper. On page 3129 (Design and Treatments section, right column), the fourth sentence of the paragraph should read (correction in boldface): “The DFM was an extract of *A. oryzae* (Amaferm, BioZyme Enterprises Inc., St. Joseph, MO) and was fed at a rate of **10 g/cow per d.**”

In Table 1 (page 3130), the inclusion rate for the DFM in the LC+DFM diet should be **0.01%**.

The authors regret this error.
