Erratum to “Comparison of bulk-tank standard plate count and somatic cell count for Wisconsin dairy farms in three size categories” (J. Dairy Sci. 94:4237–4241)

S. C. Ingham, Y. Hu, and C. Ané

An error was noted in the units for SPC and SCC in Table 1; the corrected table is shown below. The authors regret the error.

REFERENCES

Ingham, S. C., Y. Hu, and C. Ané. 2011. Comparison of bulk-tank standard plate count and somatic cell count for Wisconsin dairy farms in three size categories. J. Dairy Sci. 94(8):4237–4241.

Table 1. Group mean values for minimum, median, mean 90th percentile, and SPC and SCC for small (≤ 118 cows), large (119–713 cattle), and confined animal feeding operations (CAFO; ≥ 714 cattle) farm size categories

Item	Small farms (n = 12,866)	Large farms (n = 1,565)	CAFO farms (n = 160)
SPC			
Minimum	25,700 ^a	25,100 ^b	25,000 ^{ab}
Median	31,300 ^a	26,000 ^b	25,400 ^b
Mean	58,700 ^a	36,300 ^b	35,000 ^{ab}
90th percentile	100,100 ^a	46,800 ^b	40,500 ^b
Maximum	250,200 ^a	110,500 ^b	113,600 ^{ab}
SCC			
Minimum	209,000 ^a	183,000 ^b	179,000 ^{ab}
Median	348,000 ^a	266,000 ^b	239,000 ^c
Mean	369,000 ^a	273,000 ^b	240,000 ^c
90th percentile	511,000 ^a	344,000 ^b	288,000 ^c
Maximum	625,000 ^a	394,000 ^b	313,000 ^c

^{a–c}Different superscript letters within a row indicate that $P < 0.017$ for pairwise comparison of group means using the Wilcoxon rank sum test.
