Erratum to “Technical note: Validation of an ELISA for measurement of tumor necrosis factor alpha in bovine plasma” (J. Dairy Sci. 94:3504–3509)

J. K. Farney, L. K. Mamedova, B. H. Godsey, and B. J. Bradford

There was an oversight in the protocol described in this paper. The final protocol outlined in paragraph 2 of the right column on page 3505 refers to a reagent diluent that is not defined. This reagent diluent is 4% bovine serum albumin in PBS (pH 7.5). The authors apologize for this omission.
