Erratum to “Comparison of estrone and 17 β -estradiol levels in commercial goat and cow milk” (J. Dairy Sci. 95:1699–1708)

D. W. Farlow, X. Xu, and T. D. Veenstra

On page 1700, the authors erroneously stated “Lactalbumin . . . is not present in goat milk.” Moreover, this factual error was misattributed to Solinas et al. (2010), which the authors read incorrectly. In fact, a recent paper by Ham et al. (2012) gives molecular weights for a variety of major proteins in cow and goat milks, one of which is α -lactalbumin.

The authors regret the error and note that none of the experimental results presented in the manuscript were affected by the error.
