Erratum to “The logistic curve as a tool to describe the daily ruminal pH pattern and its link with milk fatty acids” (J. Dairy Sci. 95:5845–5865)

E. Colman, B. M. Tas, W. Waegeman, B. De Baets, and V. Fievez

In the subsection “Linear Regression” on page 5854, the equation for parameter β_1 was erroneously given as $\beta_1 = 5.80 - 7.23 \times \text{iso C14:0} - 1.13 \times \text{iso C16:0}$. The correct equation is $\beta_1 = 5.80 + 7.23 \times \text{iso C14:0} - 1.13 \times \text{iso C16:0}$ (with a positive coefficient for iso C14:0 instead of a negative coefficient).

The authors regret the error.
