Publisher's Note

The November 2014 issue of the *Journal of Dairy Science* included an article in which errors were subsequently discovered (post-publication) by the authors in data presented in several tables and elsewhere in the article. The total log values were wrongly calculated but the changed data do not alter the discussion or conclusion of the study. Author G. D. Djira was added to acknowledge his contributions to the reanalysis of the data. However, because the errors were extensive,

a corrigendum for the complete, corrected article is included in this issue (after this note). The authors regret the error. The original article is referenced below.
