Erratum to “Kinetics of microbial methionine metabolism in continuous cultures administered different methionine sources” (J. Dairy Sci. 98:1178–1194)

J. L. Firkins, C. M. Fowler, E. Devillard, and B. J. Bequette

In Figure 3 (page 1185), one of the bars labeled M5 is incorrect. The left-hand bar for HMBi escape (determined using the M5 isotopomer) should be hatched (Met + HMBi), not open (DL-Met). The corrected figure is shown below.

The journal regrets the error.
