Corrigendum to “A survey on the incidence of *Prototheca* mastitis in dairy herds in Lublin province, Poland” (J. Dairy Sci. 102:619–628)

Tomasz Jagielski, Katarzyna Roeske, Zofia Bakula, Tomasz Piech, Łukasz Wlazło, Mariola Bochniarz, Piotr Woch, and Henryk Krukowski

In the abstract on page 619, the 13th sentence should read “All (**44**) *Prototheca* isolates recovered in this study were subjected to species- and genotype-level molecular identification.” On page 623, in the section Identification of Udder Infection, the second sentence should read “The proportion of CMT-positive cows in a sampled herd ranged from 37.5% (farm VI) to 85.7% (farm **II**), with a mean of **58.1**%.” On page 625, in the section *Prototheca* spp. Genotyping, the second sentence should read “Among **19** isolates from animal swabs and stool, 15 isolates were *P. zopfii* gen. 2, 2 isolates were *P. zopfii* gen. 1, and 2 isolates were *P. blaschkeae*. All corrections are shown in bold.

The authors regret the errors.
