2010 Impact Factors Released

The Journal of Dairy Science® continues to be the best scientific journal that serves the international community of dairy scientists. The Impact Factor for JDS from the most recent Thomson Reuters report (2010 data) is 2.497, which is the second highest Impact Factor among 55 major journals in the Agriculture, Dairy, and Animal Science category. JDS continues to be the number one ranked journal by 5-year Impact Factor out of these 55 journals, and number one by Eigenfactor Score, which eliminates self-citations. JDS ranks 18th among 126 journals in the Food Science and Technology category.

S-PAC at a Glance

S-PAC continues to grow in both the number of subscribers and high-value proceedings available in the database: 449 subscribers in 35 countries, and 39 conferences with 372 proceedings. During the past year, we have added two new conferences to our lineup, the Southern Dairy Conference and the I-29 Dairy Conference, and 56 additional proceedings to the database. S-PAC offers the most cost and time effective way to access information from these conferences and it becomes a better deal every time we add a new conference or proceedings to the database. We are always looking to add conferences that may be missing and are actively seeking to include more dairy foods and international conferences to the database. Visit http://spac.adsa.org/ to check out the complete list of conferences. If you are not already a subscriber, it is a great time to join. Please contact Ken Olson (keolson@prodigy.net) with questions or suggestions.

Twenty-Second Discover Conference

Upcoming Meetings . . .

The Oskar Kellner Symposium, Metabolic Flexibility in Human and Animal Nutrition, will be held September 9–11, 2011, Neptun Hotel in Warnemünde, Germany (on the Baltic coast). The symposium is being hosted by the German (GfE, DGE) and UK Nutrition Societies and strives to form a bridge between metabolic and nutrition research in animals and humans and should provide an overview on common regulatory principles and current concepts. The topics selected are of interest to both human and animal nutrition research. The symposium provides opportunities for scholars and applied scientists in animal and human nutrition and physiology research to share information both formally and informally in the spirit of open communication. A further aim is to provide special opportunities for PhD students and young scientists to get into contact with established researchers in the field. Visit the meeting website (http://oks.fbn-dummerstorf.de) for more information.

The international Conference on Udder Health and Communication is to be held October 25–27, 2011, in Utrecht, the Netherlands. This conference is organized by the Faculty of Veterinary Medicine, the Dutch Udder Health Centre, GD Animal Health Service, and Wageningen University. Worldwide, mastitis is one of the most studied diseases in dairy cattle. Nevertheless, mastitis is still the most important disease in dairy cows in many countries. Udder health is important because of the quality of milk, health and welfare of the cow, economic losses and the image of milk produc-
Scientific presentations on various topics related to mastitis and communication will provide an excellent setting to learn about the latest insights in mastitis control in its broadest sense. Visit the conference website (http://www.mastitisconference2011.com/) for more information.

**Positions Available . . .**

The deadline for the submission of position announcements for publication in the *Journal of Dairy Science* is the 25th day of the month, two months preceding the month of issue. For example, ads submitted by May 25 will be printed in the July issue of the journal.

Fees for ads are based on membership in the American Dairy Science Association or the American Society of Animal Science. For members, the flat fee is $150; for others, $250. We do not accept display ads. Ads from agencies are not commissionable.

Position announcements should be electronically submitted, using the form on the Federation of Animal Science Societies (FASS) Web site, http://www.fass.org/job.asp, for publication in the printed version of the journal and online at the FASS Job Resource Center. Ads that appear in the printed version will automatically be posted online at no extra charge. Ads that are received past the deadline will appear only on the Web site.

If electronic submission is impossible, ads can be e-mailed to fass@assochq.org. Ads should be formatted as a single paragraph; complete sentences should be used. Advertisers will receive an invoice after the ad is posted or published; those who meet print publication deadline will receive a tearsheet with the invoice.

For more job position announcements, please see the FASS Job Resource Center at http://www.fass.org/job.asp.

- **Quality Assurance Supervisor.** Saputo Cheese USA Inc. seeks a quality assurance supervisor to develop, implement, and monitor food safety programs, as well as oversee activities of lab personnel, for its manufacturing facility in South Gate, California. The minimum requirements for the position are a Master’s degree in agriculture with specialization in dairy products technology, dairy science, or related field, plus three months of supervisory experience in a dairy-manufacturing or cheese-manufacturing environment. Send résumé to Christine Hedrick, Regional HR Manager, Saputo Cheese USA, 901 Levin Ave., Tulare, CA 93274.
