The deadline for the submission of position announcements for publication in the Journal of Dairy Science is the 25th day of the month, two months preceding the month of issue. For example, ads submitted by May 25 will be printed in the July issue of the journal.

Fees for ads are based on membership in the American Dairy Science Association or the American Society of Animal Science. For members, the flat fee is $150; for others, $250. We do not accept display ads. Ads from agencies are not commissionable.

Position announcements should be electronically submitted, using the form on the Federation of Animal Science Societies (FASS) Web site, http://www.fass.org/job.asp, for publication in the printed version of the journal and online at the FASS Job Resource Center. Ads that appear in the printed version will automatically be posted online at no extra charge. Ads that are received past the deadline will appear only on the Web site.

If electronic submission is impossible, ads can be e-mailed to fass@assochq.org. Ads should be formatted as a single paragraph; complete sentences should be used. Advertisers will receive an invoice after the ad is posted or published; those who meet print publication deadline will receive a tearsheet with the invoice.

For more job placement announcements, please see the FASS Job Resource Center at www.fass.org/

Nutritionist. Nutreco USA has an opening for a nutritionist. Reporting to the general manager, the nutritionist is an integral member of the nutrition team responsible for delivering our strategy while advising on products and feeding programs to meet customer’s animal nutritional needs.

Specific responsibilities include, but are not limited to the following: function within the sales team to ensure the optimum performance of products and feeding programs; focus on maintaining a persistent and diligent value-added strategy; work closely with the other members of the nutrition team and with the purchasing and production staff to ensure that products conform to specified standards; keep informed of all pertinent issues and competitive activities as they arise by attending industry functions, networking with
industry representatives, and continually reviewing industry publications; in conjunction with other staff members, network within the industry to ensure a complete knowledge of industry activities and trends affecting the industry; along with the other members of the nutrition team, work with the available technology to optimize formulations for all plants, and communicate effectively with the feed mills and mill managers; participate within the national species team; apply internal software (Brill software) and be able to train others in their use; support sales efforts with on farm calls and customer support as required; support the Formulation/HACCP/QC teams in areas such as tags, regulatory issues/registrations and quality control/assurance programs.

Preferred hiring criteria include a bachelor’s degree in animal sciences or related discipline; equivalent combinations of education, experience, and training will be considered. A minimum of 5 years’ experience in nutrition, with strong understanding of regulatory requirements is preferred. The ideal candidate will have the ability to quickly prioritize individual responsibilities and effectively manage time; strong analytical skills with attention to detail; proven ability in accurate and cost-effective decision making; knowledge of livestock production and management and a thorough understanding of the local industry; a high level of computer competency including knowledge of Microsoft Office applications; excellent oral and written communications skills; and a proven ability in working within teams and in a team environment.

Contact andrew.hunt@nutreco.ca for more information.
