CONTENTS

Editorial
Announcing the ADSA Loyalty Program and other developments
Paul J. Kononoff and Jessica A. A. McArt ................................................................. 1

Perspective
Perspective: Prolonged cow-calf contact—A dilemma or simply another step in the evolution of the dairy industry?
Nigel B. Cook and Marina A. G. von Keyserlingk ............................................. 4

Dairy Foods: Bioactivity and Human Health
Synergistic effects of MFG-E8 and whey protein on mitigating d-galactose-induced sarcopenia through PI3K/AKT/PGC-1α and MAPK/ERK signaling pathways
He Li, Kaifang Guan, Rongchun Wang, Aihua Zhu, and Ying Ma ............................. 9
Bovine milk osteopontin improved intestinal health of pregnant rats fed a high-fat diet through improving bile acid metabolism
Lihua Han, Qiqi Li, Min Du, and Xueying Mao ................................................... 24
Peptidome comparison on the immune regulation effects of different casein fractions in a cyclophosphamide mouse model
Junpeng Zhang, Xiaomeng Wu, Jinhong Zhao, Xutong Ma, M. Safian Murad, and Guangqing Mu .......................................................... 40
Buffalo yogurt fermented with commercial starter and Lactobacillus plantarum originating from breast milk lowered blood pressure in pregnant hypertensive rats
Liang Yi, Jiang Tie Min, Chen Li Jun, He Xiao Long, Hock Eng Khoo, Zhao Jun Ying, and Song Jia Le .......................................................... 62

Dairy Foods: Chemistry and Materials Science
Functionality of process cheese made from Cheddar cheese with various rennet levels and high-pressure processing treatments
B. Riebel, S. Govindasamy-Lucey, J. J. Jaeggi, and J. A. Lucey .............................. 74

Dairy Foods: Dairy Product Microbiology and Safety
Milk fat globule membrane protects Bifidobacterium longum ssp. infantis ATCC 15697 against bile stress by modifying global transcriptional responses
Gongsheng Zhang, Mingxue He, Lihong Xiao, Yuehua Jiao, Jianchun Han, Chun Li, Michael J. Miller, and Lili Zhang ......................................................... 91
Optimization of lactic acid bacterial starter culture to improve the quality and flavor characteristics of traditional Hurood
Yang Yang, Yanan Xia, Yu Rong Wang, Li Shan Sun, Quan Shuang, and Feng Mei Zhang ............................................................... 105
Fermentation characteristics and postacidification of yogurt by Streptococcus thermophilus CICC 6038 and Lactobacillus delbrueckii ssp. bulgaricus CICC 6047 at optimal inoculum ratio
Yuanyuan Ge, Xuejian Yu, Xiaoxin Zhao, Chong Liu, Ting Li, Shuaicheng Mu, Lu Zhang, Zhuoran Chen, Zhe Zhang, Zhiquan Song, Hongfei Zhao, Su Yao, and Bolin Zhang ......................................................... 123
Dairy Foods: Processing and Engineering

Comparison of milk protein concentrate, micellar casein, and whey protein isolate in loading astaxanthin after the treatment of ultrasound-assisted pH shifting

Bioactivity and volatile compound evaluation in sheep milk processed by ohmic heating
Celso F. Balthazar, Sinara Teixeira, Mirella R. V. Bertolo, Ramon Silva, Stanislau Bogusz Junior, Adriano G. Cruz, and Anderson S. Sant’Ana

Dairy Foods: Sensory Analysis

Milk beverage base with lactose removed with ultrafiltration: Effect of fat and protein concentration on sensory and physical properties
A. J. Hernandez, T. Truong, D. M. Barbano, and M. A. Drake

Production: Animal Nutrition

Postprandial metabolism and gut permeability in calves fed milk replacer with different macronutrient profiles or a whole milk powder
J. N. Wilms, M. H. Ghaffari, P. Stahel Darani, M. Jansen, H. Sauerwein, M. A. Steele, J. Martín-Tereso, and L. N. Leal

Water, mineral, and blood acid-base balance in calves with naturally occurring diarrhea receiving two alternative oral rehydration solutions or a placebo
J. N. Wilms, M. H. Ghaffari, J. B. Daniel, L. N. Leal, J. H. Mica, and J. Martín-Tereso

Effects of dietary fat, nitrate, and 3-nitrooxypropanol and their combinations on methane emission, feed intake, and milk production in dairy cows
Morten Maigaard, Martin R. Weisbjerg, Marianne Johansen, Nicola Walker, Christer Ohlsson, and Peter Lund

Lactational performance, enteric methane emission, and nutrient utilization of dairy cows supplemented with botanicals

Feeding spent hemp biomass to lactating dairy cows: Effects on performance, milk components and quality, blood parameters, and nitrogen metabolism
Agung Irawan, Gracia Maria Puerto-Hernandez, Hunter Robert Ford, Sebastiano Busato, Serkan Ates, Jenifer Cruickshank, Juliana Ranches, Charles T. Estill, Erminio Trevisi, and Massimo Bionaz

Increasing palmitic acid and reducing stearic acid content of supplemental fatty acid blends improves production performance of mid-lactation dairy cows
A. M. Bales, M. E. Cinzori, and A. L. Lock

A meta-analysis of methane-mitigation potential of feed additives evaluated in vitro

Effects of dietary chromium supplementation on blood biochemical parameters in dairy cows: A multilevel meta-analytical approach
Muhammad I. Malik, Arjan Jonker, Didier Raboisson, Baijun Song, Muhammad A. Rashid, and Xuezhao Sun

Production: Farm Systems and Environment

Milk yield residuals and their link with the metabolic status of dairy cows in the transition period
### Predictive models for disease detection in group-housed preweaning dairy calves using data collected from automated milk feeders

R. K. Perttu, M. Peiter, T. Bresolin, J. R. R. Dórea, and M. I. Endres ................................. 331

### Fitting mathematical functions to extended lactation curves and forecasting late-lactation milk yields of dairy cows

David J. Innes, Linaya J. Pot, Dave J. Seymour, James France, Jan Dijkstra, John Doelman, and John P. Cant .................................................................................................................. 342

### Modeling ammonia emissions from manure in conventional, organic, and grazing dairy systems and practices to mitigate emissions

Horacio A. Aguirre-Villegas, Caleb Besson, and Rebecca A. Larson ........................................ 359

### Evaluating enteric methane emissions within a herd of genetically divergent grazing dairy cows

## Production: Genetics and Genomics
