The meeting was called to order by President Legates at 0830 on June 21, 1975 in Manhattan, KS. C. L. Norton and Ross Mickelson of Kansas State University welcomed the officers, directors, and editors to the University campus.

The first item of business was approval of the minutes of the 1974 annual meeting of the board June 22, 1974, and published in the Journal of Dairy Science, Volume 57, Number 9, September 1974. Director T. H. Blosser moved the minutes be approved as published. The motion was seconded by Director Schultz, and the minutes were approved.

The next item to be considered by the Board was any old or unfinished business. In its absence, the Executive Committee reported.

Executive Committee. The Executive Committee of the Board met following the annual meeting of the program planning committee in Des Plaines, IL, on October 25, 1974. Those present were: J. E. Legates, President; L. G.
Board of Directors and Editors of ADSA 1974–75

Harmon, Vice-President; E. N. Boyd, Treasurer; and C. J. Cruse, Executive Secretary. Considered was a request from members of the Program Planning Committee for the annual meeting for expenses incurred in travel, secretarial help, postage, telephone calls, etc. The Executive Committee agreed that departments have some responsibility to scientific societies but in cases where expenses had to be reimbursed, the Executive Secretary was instructed to honor such requests.

R. P. Niedermeier’s correspondence which requested reconsideration for affiliation with the Council of Agricultural Science and Technology (CAST), was presented by Legates. The committee discussed affiliation and agreed to study CAST functions further and to bring the matter to the Board of Directors at the 1975 annual meeting to be in June, 1975.

The Executive Committee received a final draft from the Student Affiliate Division to establish an award for undergraduate scholarship recognition. The Committee suggested the award be presented at awards meetings of local clubs rather than at the Student Affiliate Luncheon at the annual meeting of ADSA. Legates would advise the committee making the recommendation for the establishment of the award of the approval and encourage them to proceed. The final draft did not outline procedures for obtaining nominations and making selections.

L. J. Boyd’s report on ways to improve communications with the greater segment of ADSA members and potential members was reviewed and recommended to the Board of Directors for approval.

L. G. Harmon reported that the Internal Affairs Committee was in the process of obtaining copies of the Constitution and Bylaws of the Division for the purpose of reviewing and recommending changes to be sure all documents were consistent. Dr. Harmon stated documents would be edited and presented for approval of the Executive Committee at their Spring meeting 1975.

G. Malcolm Trout’s proposal for a historical review of ADSA, “Technological Changes from the 50th to the 75th year of the Association,” was discussed. Further consideration was given to the appointment of a committee to evaluate the material to be published in an anniversary issue.

The last item considered was the expansion and relocation of the National Office of ADSA. Due to the ever increasing labor costs and availability of trained personnel, Cruse presented a plan for in-house composition for the Journal of Dairy Science, Journal of Animal Science, and Biology of Reproduction. The
Committee approved the plan and accepted the estimate of annual composition costs for the Journal. The Committee also approved securing an option on property on South Sixth Street, Champaign, IL, for the full Board of Directors to inspect prior to purchase. If this failed to mature, then 3800 square feet of space in the Illinois Building was to be contracted for, with remodeling by ADSA.

There being no further business for the Committee, the meeting was adjourned at 1800 hours, with the next meeting of the Executive Committee scheduled for April 10 to 11, 1975, at the National Office of ADSA.

The Executive Committee of the Board met in Champaign, IL, on April 10 to 11, 1975, to receive, review, and form recommendations on annual reports of committees and representatives to and conduct interim affairs of the Association. Those present were: J. E. Legates, President; L. G. Harmon, Vice-President; E. N. Boyd, Treasurer; and C. J. Cruse, Executive Secretary. L. D. McGilliard, Editor-in-Chief, was present for a part of the meeting. Legates led the discussion of disposition of submitted reports. The original reports are on file in the National Office of ADSA.

Editor-in-Chief. In Volume 57, 1975, there were 1610 pages published, containing 165 research papers, 34 technical notes, 22 components of symposia, 2 "Our Industry Today," and 359 abstracts from annual meetings. The time of receipt to publication averaged 258 days; and in 1974, there were 352 manuscripts received for review. The number of manuscripts reviewed had increased and the turnaround time from receipt of manuscripts to publication in the Journal had decreased. Recommended approval of the report.

Dairy Foods Division. Procedures for rotational selection of divisional officers, call for chairpersons of Dairy Foods Research and Industry and Business sections to become chairperson and vice-chairperson, respectively, of the Division in 1975. Recommended approval of the report.

Production Division. A total of 155 abstracts were submitted for the 1975 annual meeting, which is a decrease of 50 papers over 1974. There were 9 papers submitted by Student Affiliate members of ADSA for presentation in the graduate student scientific presentation contest. Recommendations we received were to publish the revised bylaws of the Division in the Journal of Dairy Science, and to authorize Association funds for development of the Production Division program in March prior to the annual meeting. Report recommended for acceptance.

With regards to specific recommendations, the Executive Committee approved publishing the revised Bylaws of the Production Division in the Journal of Dairy Science. The Committee recommended that, with regards to Association funds for the development of the program, a request for funds should be made known to the chairman of the program committee who in turn would present the requested budget to the Executive Committee for approval at the fall meeting of the Program Planning Committee and Executive Committee.

Business and Industry Section. Received an information report on planning for the Business and Industry program for the 1975 annual meeting. The Executive Committee recommended that the annual report from the Business and Industry Section and the Manufacturing Section be submitted to the Division and the chairman of the Division submit an annual report to the Executive Committee for consideration.

Northeast Division of ADSA. 1974–75 Joint Northeast Division of ADSA and Northeast Section of ASAS Annual Meeting was scheduled for July 13 to 15, 1975, University of Maine, Orono. The program committee, joint between the two regional committees and now functioning, was in its 5th year of operation at the July, 1975, meeting. During the 1975 meeting, the two regional societies held a common business meeting, which is a recognized effort to bring these societies closer together. Recommended acceptance of the report.

Southern Division of ADSA. Received and reviewed the minutes of the annual business meeting of the Southern Division of ADSA February 4, 1975, in New Orleans, LA.

Student Affiliate Division. The report reflects an active and productive year for the Student Affiliate Division. The request that all business transactions be handled by the Association’s Executive Secretary is acknowledged. Recommended approval of the report and to commend the President for an active year.

Received a report of an active committee
during 1974, listing several activities planned and in progress for the current year. Activities planned were a symposium, exhibit of text and teaching aids for the beginning course in Dairy Science, a survey to establish the status of dairy education in the United States, and a study of dairy course evaluation form. Recommended approval of the report.

**International Relations Committee.** The primary activity of the committee during the year was planning for the international reception to be held during the seventieth annual meeting of ADSA. The committee also has been responsive to the shipment of books and journals to developing nations. Recommended full review of the report by the Board of Directors and approval.

**Membership Committee.** Received the report with thanks and commendation for a thorough and extensive report. With regards to specific recommendations, approval would be recommended for appointing the 1975–76 membership chairman prior to the annual meeting; better communications on information with regards to membership to the state, regional, and national chairmen; revise and update the membership brochure when the current supply is depleted. With regards to the three awards presented in 1973 and ’74, due to co-chairmen being named within the states, five such awards will be presented in 1975. It is suggested that an appropriate certificate be designed and submitted to the Executive Secretary in lieu of the presentation of a plaque to the winners in the membership program.

**Program Committee.** Jack Albright, Chairman of the Annual Meeting Program Planning Committee, is to be commended for outstanding efforts in developing the 1975 annual meeting program, also for securing the financial support from the National Dairy Council for a symposium entitled, “Nutritional and Processing Problems for Use of Phosphates in Food.” Recommended approval of the report.

**Resolutions Committee.** Recommended approval of the submitted report.

Recommendations that the Board of Directors consider the appointment of a special committee to give thought to a 25 year historical highlight reviewing developments and introductions in dairy science 1956 to 1980 inclusively has been referred to the Internal Affairs Committee. Recommended acceptance of the Historian’s Report with commendation for a very thorough annual report.

**Milk Synthesis.** Received a progress report with regards to plans for the 1975 annual meeting and recommended approval.

**Nutrient Labeling of Selected Dairy Products.** This committee was appointed to serve as liaison between the ADSA and the Milk Industry Foundation on matters concerned with the nutritional labeling of selected dairy products. This committee served as scientific consultants in establishing a protocol acceptable to the Food and Drug Administration that could be followed by the Milk Industry Foundation as they developed recommendations for the proper labeling of selected dairy products to meet new FDA regulations. The recommendations were published in a manual entitled “MIF Labelling Manual,” and distributed by the Milk Industry Foundation.

Inasmuch as the work of the committee has been completed and the committee has been inactive during the past year, it has recommended that the committee be discharged and the report approved.

**Intersociety Committee on Animal Care.** In view of the inactivity of this committee during the past year, it was recommended the committee be discontinued. The Executive Committee accepted the report, but recommends the committee be continued for the coming year.

**Intersociety Committee on Drugs and Chemicals.** Primary emphasis of the committee during the year centered on the revision of the FDA guidelines for the approval of infusion products for mastitis. Through the efforts of committee members, Curtis Miller and John Adams of The National Milk Producers Federation and ad hoc committee of the National Mastitis Council are completely rewriting these guidelines. The committee is serving a vital function for the entire animal industry and the chairman has maintained liaison with the ASAS Feed Additives Committee. The committee has met twice with FDA officials and recommends continuation of the intersociety committee. Recommended approval of the report.

**Intersociety Committee on Animal Wastes.** Received an informative report on the third International Symposium on Livestock Wastes to be in 1975 at the University of Illinois. Recommended approval of the report.
Dairy Remembrance Fund. Recommended approval of the report and published the policy of the Dairy Remembrance Fund which is as follows: Only United States and Canadian students who are candidates for undergraduate or graduate degrees in Dairy Science, Dairy Technology, Food Science, and related marketing fields and who plan to pursue a career in these fields shall be deemed qualified for Dairy Remembrance Fund loans.

ADSA Representative Reports

Federation of Animal Science and Technology Society. In 1974, the ASAS Board of Directors discharged their committee representative responsible for representing FASTS. This action was taken following review of the ADSA proposal prepared and approved by ADSA Directors at the June 1974 meeting. In view of this action, ADSA President J. E. Legates has recommended that it would be best for ADSA to set aside the FASTS proposal. Recommended approval of the report.

National Association of Animal Breeders. Recommended approval of the report.

National Mastitis Council. Recommended approval of the report and $150 travel expense during the coming year for the chairman.

Ralston Purina Fellowship Award. Recommended approval.

3-A Sanitary Standards Committee. Recommended approval of the report and commendation of the chairman for the work done during the past year.

U. S. Animal Health Association. Recommended approval of the report. The Internal Affairs Committee has recommended that our ADSA representative to the U. S. Animal Health Association also serve as an ex officio member of the Health Committee of the Production Division.

Council of WAAP. Recommended approval of the report.

Treasurer's Report. The balance sheet prepared by Lafferty & Son, Champaign, IL, and distributed from the National Office of ADSA reveals an increase in the net worth of $14,317 during the fiscal year 1974. Net worth of the Association has increased from $133,465 to $147,842 as of December 31, 1974. The comparative financial report from 1966 to 1974 shows a net gain recorded for 7 of the past 9 years. ADSA reserves have increased $66,074 during this time. Our goal is to have a reserve in an amount equal to one year of operating expenses, which is considered to be sound business practice.

The budget for the fiscal year 1975 was revised in October of 1974 after receiving a plan and budget for an in-house composition department in the National Office of ADSA. The revised budget sets income at $259,200 and expenses at $247,600 for an anticipated net gain of $11,600. The proposed budget for 1976 has been prepared for an income of $298,000 with expenses set at $266,564 for an expected net gain of $32,036.

Requests for an increase in the service fee to ASAS, SSR, and WSSA from $3.00 to $4.00 per member or subscriber effective January 1975 and for IWRA effective January 1976 were approved by the governing bodies of each of the organizations in the fall of 1974. This service has proven to be financially beneficial to the participating organizations.

In view of the financial report for the fiscal year 1975 (anticipated net gain for 1975 and 1976), no recommendation is being made for increases in sources of income in the areas of dues, reprints, page charges, or subscription rates for the year 1976.

Executive Secretary's Report. The Journal of Dairy Science took on a new look with the May 1975 issue. Long produced by linotype (hot metal) composition and letter press printing, the Journal is now produced by cold type composition and offset lithography. Plans for the conversion from the letter press process to the offset process have been under consideration for some length of time. The first major step was taken by the Executive Committee in October 1974 after being presented with a plan by the Executive Secretary for in-house composition, provided space and staff were available.

The needed space was acquired in the same building where the National Office has been housed for the past 5.5 years. Remodeling of 3800 square feet of raw warehouse and storage space began in October, 1974. This was completed and the office was moved on February 21, 1975. Installation of two IBM MTSTs and two IBM Selectric composers was accomplished on February 1. The agreement with Wayside Press for producing the Journal of Dairy Sci-
ence was terminated with production of the April, 1975, issue and composition for May, 1975, was undertaken. At the same time, composition for a 500 page July issue of Animal Science and the August Biology of Reproduction of 120 pages was underway.

Circulation of the Journal remains at approximately the same as 1 year ago. The 4516 copies circulated in May, 1975, were to 2030 members, 401 students, 2011 subscribers, 15 honorary members, 4 life members, 26 sustaining members, 17 complimentary, and 7 advertisers. In addition, we have 140 student members, 1 honorary, and 115 life members on record who do not receive the Journal. Professional membership is down 117, student membership up 31, and subscribers up 22 compared to 1 year ago.

The call for nominations of candidates for ADSA Awards was mailed with the first renewal notice for 1975 membership dues in October of 1974. This brought a total of 99 nominations for all ADSA awards. Although the form used for nominations indicated the principal nominator will prepare dossiers, only 50% responded to our request and forwarded the necessary material to the chairmen of the selection committees. Ballots for election of Vice-President and Directors were mailed with the preregistration material for the 1975 annual meeting, and only 19% of the membership of ADSA cast ballots.

The following members of ADSA were deceased since July 1, 1974: John W. Bratzler, PA; L. A. Johnson, MI; Walter Kasdorf, Argentina; W. B. Neves, IL; H. A. Ross, CA; J. W. Stills, NY; J. S. Taylor, PA; R. E. Leighton, TX; Paul Lucas, MI; and L. A. Moore, NY.

Applications were received from four ADSA members for life membership, G. E. Parson, MI; E. I. Robertson, PA; K. G. Weckel, WI; and C. H. Parsons, MA.

As of July 1, the staff totaled 11, which includes an assistant to the Executive Secretary. Robert A. Schmidt of Champaign joined us after serving 18 years with the Twin City Printing Company and Girard Press and the R. F. Colwell Printing Corporation. Bob has wide experience in the graphic arts, publishing, and business administration, and he will be an asset to the American Dairy Science Association. I am deeply grateful to this organization for the foresight shown 1 year ago in the approval of an appropriation of funds to enable the appointment of Bob to the position.

Future Meetings of ADSA
1976 North Carolina State University, Raleigh, June 20 to 23.
1977 Iowa State University, Ames, June 26 to 29.
1979 Utah State University, Logan, June 24 to 27.
1980 Virginia Polytechnic Institute and State University, Blacksburg, June 15 to 18.
1981 Louisiana State University, Baton Rouge.

Other items considered by the Board. L. D. McGilliard, Michigan State University, was re-appointed Editor-in-Chief for three years beginning January, 1976. C. A. Ernstrom was appointed Associate Editor for three years beginning January, 1976.

Vice-President Elect R. P. Niedermeier addressed the Board of Directors on affiliation with the Council of Agricultural Science and Technology. Dr. Niedermeier set forth the purposes and activities of the organization and recommended that consideration be given to affiliation. After discussion, the Board approved that a statement of purpose of the Council of Agricultural Science and Technology be circulated to the members of ADSA along with a ballot for the members to determine if ADSA should affiliate with the Council of Agricultural Science and Technology and pay an annual dues of $2250.

The office of Treasurer of ADSA was discussed by the Board, and several possibilities were suggested. It was agreed that the Treasurer must be knowledgeable of business affairs and work closely with the National Office of ADSA. The Executive Secretary favored a three-year appointment on the basis of continuity and familiarity. Appointment of either a Board member or non-Board member was deferred to Wednesday morning during the reorganization of the Board of Directors.

Publication of abstracts to be presented at an annual meeting in the May issue of the Journal of Dairy Science and in the program was discussed by the Board. The matter of publishing abstracts in the Journal of Dairy Science was to be referred to the Journal of Dairy Science Vol. 58, No. 9
The Board received written requests for financial support from the American Association of Accreditation of Laboratory Animal Care and from the Dairy Food Industry Supply Association. After a lengthy discussion of the two requests, it was the general consensus of the Board that ADSA was not in a position to comply with the requests for financial support.

Correspondence from W. T. Diamond, Secretary-Treasurer of the American Feed Manufacturers Association, on the revision of eligibility for their award was presented to the Board. The statement on eligibility for a candidate to have made a noteworthy contribution to the science of dairy cattle nutrition within 3 calendar years immediately prior to the year in which the award is made has been revised to read 5 calendar years. In addition, Diamond notified the Executive Secretary that the AFMA has renewed sponsorship of this award to ADSA for the years 1975 to 1977, ensuring that scientific endeavor can be recognized via this means at the ADSA annual meetings.

The Student Articular, news of student affiliate chapters of ADSA published in the Journal of Dairy Science, was an item of discussion. There appeared to be no firm guidelines for material published in this section, but it was decided this should be limited to chapter news and papers in the student contest at an annual meeting should not be published.

Director L. J. Boyd, chairman of the committee to recommend ways to improve communications with a greater segment of members or potential members, reported the committee recognized a real need for ADSA to serve a broader segment of the dairy industry. The committee recognized the importance of retaining the perspective that JDS is the official publication of a science association. Yet, our dairy scientists have the obligation to point out, where appropriate, applications of science to commercial production. The committee recommended that no consideration be given to the publication of a separate journal consisting of popular articles only. They further recommended that either a section entitled "Applied Dairy Science" be added to the Journal or the present section named "Our Industry Today" be expanded. Director Gregory moved, seconded by Hedrick, that the section named "Our Industry Today" be expanded and provision be made for publication of material received in the area of applied dairy science. The motion carried.

President Legates reported on the Intersociety Presidents' meeting held in the Fall of 1974 and hosted by the President of the Poultry Science Association. The Intersociety Presidents' Annual Meeting is now held within 60 days of the last annual meeting of the Associations participating. In 1975, the American Dairy Science Association will host the Intersociety Presidents' Meeting, hopefully immediately following the Program Planning Committee meeting, and it will be in the National Office of ADSA.

The Board adjourned and reconvened on Wednesday morning at 0830 prior to the annual business meeting of ADSA. The Board of Directors reconvened on Wednesday at 0830 for reorganization. The newly elected Vice-President, R. P. Niedermeier, and Directors, J. R. Campbell and J. H. Nelson, were welcomed to the ADSA Board of Directors. President Legates confirmed the three-year appointments effective January, 1976, of Editors L. D. McGilliard and C. A. Ernstrom.

L. G. Harmon proposed that a canvassing committee be appointed for the annual ADSA Awards to ensure that worthy candidates were nominated and considered for the various awards. The expansion of the section entitled "Our Industry Today" in the Journal of Dairy Science was an item of discussion. In the view of the work ahead, it was recommended that the Journal Management Committee give consideration to a separate editorial committee for ways and means to expand this section as well as methods for selection and review.

The Board confirmed the 1980 annual meeting will be hosted by the Department of Dairy Science and the Department of Food Science and Technology, Virginia Polytechnic Institute and State University, Blacksburg. The dates of June 15 to 18, 1980, for the annual meeting were approved as requested by R. G. Cragle and R. B. Lechowich.

The Past Presidents' Dinner and Social Hour were discussed, and it was suggested that this function be hosted by the immediate Past President of ADSA. Future functions for the Past Presidents will be programmed by the
Board of Directors and Editors of ADSA 1975–76

immediate Past President.

Reorganization of Board

Legates expressed his appreciation to the members of the Board for their assistance and cooperation during his term as President and turned the gavel of the Association over to incoming President, L. G. Harmon. President Harmon accepted the gavel and proceeded with the appointments and confirmation of the committees and representatives for July, 1975 to June, 1976. The listing of officers, directors, committees, and ADSA representatives is published in the following pages of this issue of the Journal.

A request from the Student Affiliate Division to add a second and third monetary award to the Outstanding Student Affiliate Chapter Awards each year was considered. After discussion, the Board approved the first place winner would receive a plaque and check for $100; second place, $50 and a certificate; and third place, $25 and a certificate.

Following the appointment of Board members to special and standing committees, the Board adjourned to the Student Union Forum Hall for the Annual Association Business Meeting.

Seventieth Annual Business Meeting

J. E. Legates opened the 70th Annual Business Meeting at 1100 hours and welcomed members and guests. He called upon Earl Farmer from the committee for local arrangements to report attendance for the annual meeting. Total registration for the 1975 Annual Meeting was 1140, which was less than anticipated and previous years’ attendance. There were 583 professional members, 161 student affiliate members, 71 nonmembers, 207 ladies, and 118 children.

Legates expressed appreciation to Farmer and to the staffs of the Department of Dairy and Poultry Science in hosting the annual meeting and providing excellent service and facilities for the members and guests attending. L. G. Harmon, incoming President, was called upon to present the activities of the Board and major actions during the Board meeting on Saturday, June 21. During the past year with
valuable assistance from the Editor-in-Chief, L. D. McGilliard, the Constitution and By-laws of the Divisions of ADSA were edited, corrected, and published in the May, 1975, issue of the Journal of Dairy Science. Expansion of space of the National Office of ADSA in Champaign, IL, to accommodate additional personnel and implement an in-house composition department, was authorized. The Executive Committee approved the appropriation to the salary budget to provide for an assistant Executive Secretary, who began duties with the Association on July 1, 1975. Harmon reported on the low percentage of members casting their ballots for the election of officers who took office during this annual meeting. Only 19% of the membership voted, and in view of this it was recommended that ballots for the election of officers be a separate mailing and not included with the pre-registration mailing as has been the practice for the past several years. Harmon reported the Board of Directors voted 8 to 2 to recommend affiliation with CAST and to provide the members-at-large of ADSA to cast their yes or no on affiliation through a mail ballot this Fall. The question of a mail ballot to the members on affiliation was raised from the floor, and Legates summarized the Board's discussion. In view of a continuing financial commitment and to keep the members informed, the decision was for a mail ballot.

The next item of business was that of the financial status of the Association and Legates advised members that the annual financial report had been reviewed and accepted and called upon the Treasurer, E. N. Boyd, to present the Treasurer's Report. This report is published in the previous pages of this issue of the Journal.

Claude Cruse, Executive Secretary, was called for any comments he wished to make. What I would like to do at this time is to review the National Office of the American Dairy Science Association. It was just 9 years ago this month that the Board of Directors after about a year to a year and a half of "Will we or won't we?" made the final decision to establish a National Office and hire a full-time Executive Secretary. So, as of September 1, 1966, I opened an office in Urbana, IL, for the American Dairy Science Association—one employee, myself, in three rooms each being about 8 x 10. For the next 3 months, I was pretty much lost because I had three rooms all to myself. But 3 months later we added a secretary. A year later we added Mrs. E. K. Weber who is with me yet today.

As we moved along, we took over the registration for the annual meetings and after 2.5 years we outgrew the undesirable location in the northeast part of Champaign. We then moved into five rooms in the downtown area of Champaign into what was then the Illinois Building. Here again, they were 10 x 11, 10 x 12, something like this—all kinds of room, it was really great. Then we began to perform the services for the various organizations. The American Society of Animal Science was the first to join us. And, considering the size of that organization, we began to feel cramped in just a short time so we expanded into two more rooms. Then the Society for the Study of Reproduction also came in and wanted to partake of our services. This was followed by the Weed Science Society of America and then by the International Water Resources Association. By this time, our staff was up to five people, but we were locked in and couldn't expand any further.

For some time, I'd realized that what we call in-house composition or cold type and offset lithography was the right way to go. But I didn't feel that I could spread myself any thinner. So, I just waited, and last Fall I was fortunate enough to come across a young lady who had 7 years of experience in this very type of thing. Last October, the Executive Committee approved first, the purchase of a building; and second, larger quarters. But, before I could get back to Champaign to pick up an option on a building, someone else paid $35,000 more for it than I was going to get it for. So then, we went into the 3800 square feet. Last October, we began to remodel what was raw warehouse and storage space. And, on February 21, we moved into the 3800 square feet of modern office space. Beginning on November 1, we increased our staff to ten and we are now in full operation with setting the composition and doing the keylining, furnishing the printer with camera ready copy starting with the May issue of the Journal of Dairy Science, the July issue of the Journal of Animal Science, and the August issue of Biology of Reproduction.

The last announcement I would like to make is that a year ago the Board of Directors had
the foresight to see that the time had come for me to have an assistant. I'm happy to announce that as of July 1 Robert A. Schmidt of Champaign, IL, will join our staff as Assistant Executive Secretary.

**Production Division Report.** Robert D. Appleman, Chairman of the Production Division, was called upon to give the annual report of the Division.

B. R. Baumgardt, PA, was elected Secretary of the Production Division. M. E. Senger, NC, and R. C. Lamb (USDA, Utah State) were elected Councilmen, the latter for a 2-year term resulting from the vacancy created when Dr. Baumgardt was chosen for the secretary's position.

Two major items of business were brought to the floor in the form of resolutions. One that was tabled had to do with the American Dairy Association increasing their promotional effort on use of butter. The second, which passed with a substantial majority vote, resolved that the Production Division of the American Dairy Science Association go on record as opposing the major changes in organization, funding, and rule enforcement of the National Dairy Records Program, as proposed by the Ad Hoc Committee studying the program, in favor of continued effort for greater involvement of the National Dairy Herd Improvement Association and that policy should be designed for more effective use of dairy records in herd management. This resolution was forwarded to all members of the National DHI Coordinating Group.

Another question raised from the floor and deferred for Council consideration dealt with the purpose, objectives, and continuation of the Ad Hoc Committee on Dairy Cattle Judging.

One departure from past procedures was to delay announcement of the National Dairy Shrine Student Contest winners until Wednesday noon at the Student Affiliate Awards Luncheon. This change, according to Dr. W. M. Etnen, VA, had been requested by the Shrine.

The 1975 Production Division Meeting consisted of 155 abstracts in 16 sections, a decrease of 50 papers and 4 sections from the previous year. In addition, there were four symposia (17 presentations), two Open Forums, and seven other invitational papers presented.

The Graduate Student Presentation Contest consisted of nine papers presented in the regularly scheduled sections and each contestant's abstract was identified in the program by a (G) immediately following the paper number.

The Division officers appreciated the Association's support which allowed the officers to meet in Ames, IA, and finalize the Production Division program in early March. We believe this procedure was extremely valuable and recommend that it be continued. In fact, if financial support is limited, we recommend that the Division Vice-President be authorized to meet with the Division President in March in lieu of attendance at the October planning session authorized previously.

**Dairy Foods Division Report.** Robert T. Marshall, Chairman of the Dairy Foods Division, was called upon to give the Division's Annual Report.

The Dairy Foods Division began operation under its new set of bylaws at this annual meeting. The Division Chairperson and Vice-Chairperson now move into their offices by virtue of having been Chairpersons of the Dairy Foods Research and Industry and Business Sections. On motion in the 1974 business meeting, the Division chose to have Chairpersons of the Dairy Foods Research Section and the Industry and Business Section become the Chairperson and Vice-Chairperson, respectively, of the Dairy Foods Division for 1975-76. The selection procedure will be reversed in alternate years hereafter. Chairperson and Vice-Chairperson for 1975-76 are R. L. Sellars and J. H. Martin, respectively.

The Nominating Committee of the Industry and Business Section presented the names of Dr. Joe Cardwell (Mississippi State University) and Dr. Claude Harper (Beatrice Foods) for election of a Secretary of the Division. Dr. Harper was elected.

The two sections of the division planned and organized the following program:

1. Submitted papers – 72
   a. Dairy Foods Research Section – 63
   b. Industry and Business Section – 9

2. Symposia
   a. Dairy Foods Research – 2
      1) “Processing Problems from the Use of Phosphates in Foods”
      2) “The Impact of Heat Stable Microbial Enzymes in Food Processing”
   b. Industry and Business – 3
      1) “Shelf Life of Dairy Products”
2) “Update on Nutritional Labeling”  
3) “Cultured Products”  
c. Joint Dairy Foods Research with Industry and Business  
1) “Use of Milk Derivatives in Other Foods”
