**Supplemental Figure S1.** Daily eating (a) and ruminating activity (b) during 65% concentrate feeding (CONC 1) of cows fed either a control diet (CON), or a concentrate supplemented with phytogenic compounds (PHY) or autolyzed yeast derivates (AY). Fresh feed was delivered daily at 0800 h (forage), 1000 h (concentrate), and 1400 h (forage and concentrate).
