***Journal of Dairy Science*® is moving to open access in January 2022**

Philadelphia, November 10, 2021 – The [American Dairy Science Association](#)® (ADSA) and [Elsevier](#) are delighted to announce that [Journal of Dairy Science](#)® (JDS) will become a gold open access (OA) journal with the January 2022 issue.

This means that authors who publish in JDS can make their work **immediately, permanently, and freely accessible worldwide**. JDS authors will pay an article publishing charge (APC), have a choice of license options, and retain copyright to their published work. This change is very beneficial to authors because OA provides readers free and immediate access to scientific research and enables our authors greater opportunity to disseminate their work to the benefit of the academic community and the dairy industry.

The APC for ADSA's professional members will be \$1000 for papers submitted for peer review through January 31, 2022. Non-members who submit a paper through November 11, 2021, will also be granted a transition APC of \$1000 to publish. To learn about becoming an ADSA member and receiving a discounted APC, visit <https://www.adsa.org/Membership/Benefits-of-Membership>. The full APC rate for non-members will be \$3500.

For papers submitted February 1, 2022, or later, the APC for ADSA professional members will be \$1600.

To assist authors, readers, and ADSA members with questions they might have, please see our [FAQ](#). If there are questions the FAQ has not answered, please contact us at jds@adsa.org.

Notes for editors

About the *Journal of Dairy Science*

The *Journal of Dairy Science*® (JDS), an official journal of the American Dairy Science Association®, is co-published by Elsevier and FASS Inc. for the American Dairy Science Association. It is the leading general dairy research journal in the world. JDS readers represent education, industry, and government agencies in more than 70 countries, with interests in biochemistry, breeding, economics, engineering, environment, food science, genetics, microbiology, nutrition, pathology, physiology, processing, public health, quality assurance, and sanitation. JDS has a 2020 Journal Impact Factor of 4.034 and five-year Journal Impact Factor of 4.354 according to *Journal Citation Reports* (Source: Clarivate 2021).

About the American Dairy Science Association (ADSA)

The American Dairy Science Association (ADSA) is an international organization of educators, scientists, and industry representatives who are committed to advancing the dairy industry and keenly aware of the vital role the dairy sciences play in fulfilling the economic, nutritive, and health requirements of the world's population. It provides leadership in scientific and technical support to sustain and grow the global dairy industry through generation, dissemination, and exchange of information and services. Together, ADSA members have discovered new methods and technologies that have revolutionized the dairy industry.

About FASS Inc.

Since 1998, FASS has provided shared management services to not-for-profit scientific organizations. With combined membership rosters of more than 10,000 professionals in animal agriculture and other sciences, FASS offers clients services in accounting, membership management, convention and meeting planning, information technology, and scientific publication support. The FASS publications department provides journal management, peer-review support, copyediting, and composition for this journal; the staff includes five BELS-certified (www.bels.org) technical editors, and experienced composition staff.
